

Benefits of BlueTux Maintenance

When you partner with BlueTux for website maintenance you get all the convenience without the hassle. We'll help you maintain your site yourself or do the updates for you. When working with us you get the flexibility of doing as much (or little) as you want.

Why Choose BlueTux

Giving You Options

Web technology has improved to the point where non-technical users are able to update their site using new easy-to-use tools. We work with many different maintenance tools and provide support for these products.

By-The-Minute Billing

This sets us apart from all the rest and saves you of money! All of our maintenance services are billed by-the-minute with no minimums. Three 15-minute updates throughout the week and you can expect a 45 minute (3/4 of an hour) bill.

Same Day Updates

Small updates of an hour or less can be done the same day. If you're in a hurry, just let us know and we'll make sure you get results.

The Technical Team

The same team that develops our professional websites is maintaining them. No interns or fly-by-night webmasters. When you ask for an update you can rest assured it will get taken care of correctly.

Better Results

When you hire the professionals the results are always better. Our experience gives us an edge on the techniques used to make updates to your site. The results will look better too.

The Right Tools

We use industry standard editing tools that make updates a lot easier and quicker. All our tools work seamlessly with the update options we provide our customers to maximize effectiveness and speed of updates. More importantly though, is that we know how to use each tool's full capabilities.

Our Maintenance Capabilities

- 1 Text, Images & Media Updates**
Just send us the content and we'll have it done quickly and professionally.
- 2 Design Changes**
We can re-align designs to meet current standards and better target your customers.
- 3 Copywriting**
We can provide full service copywriting for just about any size project.

Advice, When You Need It

When you are experiencing more setbacks than successes, call us for advice. We can either tell you how to fix your problem or we can fix it for you. Think of us as a knowledge base and give us a call.

- 4 Application Setup**
Application installation, configuration, and customization.
- 5 Error Checking**
Our P2P Inspection will ensure your website doesn't have any errors.
- 6 Programming**
We provide in-house development of your web projects.

Saving You Money

We design and update sites every day and our experienced team is fast. With our low hourly rate and by-the-minute billing we almost always cost less than any in-house staff.

Contracted Website Maintenance

You don't have to host with us to enjoy our maintenance services. We can work on just about any website on any server in the world.

No Need to Meet

We have helped clients in other countries. Don't let distance get in the way of you getting great results. After we solve your first problem you'll be happy you called.

Get Updates Done Quick

Waiting for a staff member to "get around to the updates" doesn't always work. When you contact us for updates we'll get them done quickly.

Tools and Experience

It takes more than just the right tools to get the job done. When you choose BlueTux for maintenance you get the right tools and people with the experience needed to use them.

Handle Overflow Work

When your staff is overworked we are a good partner to rely on. We can get up to speed quickly and start helping your business

Just Try Us Out

Not sure it will work as easy as we say? Give us a small update and we'll show you how quickly and professionally we can deliver results.

Hosting Rewards Program

We love referrals! When you've had a great experience with us, share the news with others and we'll pay you. For every friend you refer who chooses to work with us we will credit you \$60 off your hosting account with BlueTux Hosting clients.
